## Paulina Perrault Interiors

**Paulina Perrault**

Creating beautiful  
and joyful living spaces.

### What is it about your business that makes it a great choice for clients?

I have been in the business of interior design for over 25 years. In that time, I have accumulated the knowledge and experience to create beauty that exists in parallel with feasibility, constructability and usability. We call it practical luxury — the ability to envision and create beautiful and joyful living spaces that meet our clients' needs and budgets, while expertly guiding them through the often complex journey of design and construction.

### What sets your business apart from the pack?

There are two things that really set us apart — our communication skills and our deep understanding of construction. Professional, communicative and deeply invested in each and every project, we are wired for relationships. We are also highly collaborative, committed to process and masters of detail. We are an architect's designer and we forge trusting and synergistic relationships with the architects and contractors we work with.

### How can your business approach help clients have a better experience?

We are consummate listeners. We take the time to know and understand our clients' vision and dream for their home.
